This Silver Vortex buggy comes with a full-function radio control that allows you to easily control the car, moving it backward, forwards and sides to navigate to any space. The advanced technology of the radio control provides faster response and longer range so you can attack a variety of terrain. Keep your car charged and ready with the lithium battery and USB charging allowing you to charge your car almost anywhere. Try me wrapping and machine includes light bar work. Ready to run – All pile included with USB charging. New for Fall 2020 is the VORTEX ACE edition designed specifically by Hobby Deposit to offer a more durable HSP 1/10 buggy on the standard version for the RC driver which requires more from on-road vehicles. With its blue lid striking, matching blue and color coded blue aluminum parts that perfectly compliment the blue accent on the centers of the chrome glow wheels, this bugy makes as good as it looks. The ACE models are available only in Hobby Depot and when looking for an HSP PRO model of road cars you should require that your buggy be built in the same way. Upgrades &t; Encoding improved front shock manufacturers support from heavy duty aluminum. Chocolate Absorb cords are equipped with metal body to improve strength, bounced and bounced on pepper buckle strip. Encode aluminum chassis aluminum chassis with matching internal components. The adjustable suspension all absorb 4 trauma on this ACE model are fully adjustable and allow the operator to deal in the suspension to suit what type of terrain they want to operate on. Simply turn the black adjustment on the shock body and you can apply more pre-load in the spring, ferme for a smooth surface to reduce body rolls or gentle to resist in road environments where you need all the suspension trips you can get. Rear camber wheel is adjustable along with front camber and toe in - toe also being fully adjustable via a simple turnbuckle system on the steering arms. Make sure to get the set-up that is right for just about any operating surface. Awesome motivation performance for the ACE from a powerful Brushless engine 3300kV. The drive train coupled metal scooters with primary differential gears that translate into stylish container wheel performance stands. Squeeze the throttle and watch this missile rocket in the distance. The Brushless ESC 60A Brushless Electronics Controller is fans cooled with actual reserves of the engine and on-board electronics and authority. It is programmed by the user to set race mode without reversing and also with brake functions allowing which operator can choose different Drag Force Braking to suit the type of environment the vehicle operating is being run in. Ni-MH Battery's Straps 8.4v 4200mAh Ni-MH hump battery holding engine, ESC and on-board straps with plenty of for super performance along with a realistic operation time. ACE version bugs can be equipped with a truck if you want Cougar 7.4V 4500mAh 2S 30C Hard Case Lithium Polymer battery for even more power that will take this truck to the next level of performance should the driver want insane acceleration. (Please note CG-HL30C-4500-2S Cougar 4500mAh 7.4v 2S 30C Hard Case LiPo Battery is not included with the truck but available as an extra from our web store.) When changing the battery from the Ni-MH liPo environment on the ESC will need to change so that the low voltage off is activated to protect this type of battery from crash on discharge. Instructions for ESC programming are included in the container. Battery Protection Box All ACE models have a protective battery box and keep hard space mounted in their chassis. This offers superior protection for your batteries from the purely loop environments of these machines typically operated in. High Torple Steering Servo Steering duties are ordered by an HSP E6001 6kg High Torple steervo. The servo also protects from heavy trauma burdens that can amplify into the steering components while operating in pepper loop grounds by a Servo System Save system. A special spring loaded joint is incorporating into the steer system that helps empen mild bubble into the servo and helps extend its long termening. The 2.4GHz Digital Radio Transmitter System means Green ACE Buggy supplied with a high quality HSP 2.4GHz digital radio transmitter which means you can run other used cars the same system without interfering at the same time. The radio has forward, reversed, left/right along with proportional control and travel adjustment. 2.4GHz Digital Proportional System (DPS). 2-channel transmission. Super fast safe response time. Smooth carry supported steel wheels and auto centers. Steering travel adjustment. Adaptable adaptable sensitivity via rotary relay. Double rate steering adjusted to limited steering trips. All deals with switch protected by a temperature hat. Low battery warning. Servo reverse settings for both channels. Superior rejection digital interference. Long battery run time. Low Transmission Antenna Profile. Ergonomic and lightweight design. The 2.4GHz Receiver supplied 3 channel 2.4GHz receiver is compact and lightweight and comes to match the transmitter out of the box. This receiver also offers superior rejection interference and has a safe function that can be set by the user if signal loss or voltage transmitter falls to low. Ready to run this HSP 1/10 Buggy comes as a complete package, including an ESC, 2.4GHz radio system, 4 drive system, high torple brushless motor, aluminum upper chassis batteries, aluminum drive aluminum shafts and mountain shock, oil-filled shock absorbs and spring progressive with 8.4V 4200Ah-MH battery and battery loader. Extra items are required to find this animal on the track they are 8 x AA to transmitter and ready to lift your favorite plate of dish. Quick Glimpse overprotectibility of HSP 2.4 GHz Radio System. 4WD drive system. High Precision Brushless 3300kV with Waterproof 60A ESC. 6kg Hi torple Steervo Servo. Full oil aluminum capped shocking. (color cord red) Oil service gear built-in high quality bulkhead. Precision front system steering presents quick turn response. 8.4v 4200mAh Ni-MH battery. (Optional Up-gradable 7.4V 2S 30C Li-Skin Not Included) Off tires knobby and spoke wheel rims. Styles of winged routes (encoded color red). Electric power specifications in Buggy Road. Length: 400mm. Base Wheel: 275mm. Ground Clearance: 26mm. Height: 160mm. Gear Ratio: 1:7.38 Engine: Brushless 3300kV Diameter Wheel: 86mm. Wheel Width: 32mm Front - 40m Note. Chasis: ABS Monocoque Chasis. Rechargeable battery type: 8.4v 4200mAh Ni-MH battery. Mains Power Battery Charger. Specifications are subject to change. Suitable for ages 14yrs and older. Charging time 4 hours. Full Chargers average running min 8-12. Electric top version speed: Standard: 28Kph; ACE & PRO: 45Kph, TOP: 60Kph. This fun RC model is not a game. Age 14+. Charges include car battery for 4hours only. Requires batteries for handheld transmitters (not included). Only use the correct type of rechargeable battery to operate. 1x included. Never allow rechargeable battery at low runs. Allow engine 15 min cooling time between battery changes and operations. Users are responsible for damages or injuries occurring during operation. Don't operate in bad weather like rain, wind, snow or darkness. It is important to keep away from moisture and other contaminates. Don't allow them to get wet. May be damaged or distorted due to extreme heat or cold climate. Choking hazards: There are small parts. Product Code: 94107PRO-88805 94107PRO-88805
